

“J.T.” John Tyler Pennington, LEED AP, Associate AIA

jtpennington@gmail.com ♦ (606) 923-5028 ♦ 1540 Deer Lake Drive, Lexington, KY, 40515

Objective

- ♦ Full-time graduate student at Clemson University School of Architecture M.Arch II Track

Education

- ♦ University of Kentucky [2005-2009] GPA: 3.5, Dean's List; Degree: Bachelor of Art in Architecture
- ♦ Travel Abroad in Florence, Italy - Syracuse University in Florence - Sept through Dec 2008.

Professional Experience

- In an office environment, I worked on markup drawings for schematic, design development, construction documents, and record drawings. I collected site data in the field, calculated cost estimation for project proposals, and organized project files of archived work. I reviewed submittals for multiple projects under construction and assisted in document quality control measures before drawings went out to bid. I assisted with firm promotional materials when pursuing new work, as well as managed the company website and Facebook page.
- Worked on a range of projects under the supervision of a senior project manager: worked on schematic project proposals, participated in construction progress meetings, participated in construction punch-lists, worked on design development and construction documents, made presentations for Owners, taught on the education of the LEED system.
- Over a summer, I developed a feasibility evaluation for an engineering office to expand their current location or relocate; interviewed the firm's staff to make program decisions on a future building based on the firm's current and future needs. I designed a 13,900 square foot office addition for the firm's development and growth over the next five years. Produced a model and working set of design development drawings for the office addition.
- Wrote first manuscript for book: A Builder's and Homeowner's Guide to LEED for Homes, currently awaiting the editing process to be published.

Architectural Employment History

- ♦ Gray Construction – Oct 2012 to Present – Lexington, KY
 - Intern. Architect (Contact Brian Fain 859-281-5000)
